

NAPHIT Health IT Projects Compilation

Web Sites

The articles summarized in this document represent current public health IT projects that use web sites to provide health information or access to health services to the public. NAPHIT compiles this list for its members from articles or information provided through third party entities. NAPHIT does not take credit for published articles, nor does it guarantee the accuracy of information provided by third party entities.

Oregon Launches Web Site to Provide Health Information to the Elderly and Disabled (January 2006). The Oregon Department of Human Services recently launched a web site that makes it easier for elderly residents and people with disabilities to research health care and medical information. Virginia Creates Health Insurance Resources for Small Employers (Dec 2005). The Virginia Department of Health has developed a web site and handbook to help businesses with up to 15 employees provide health insurance to their employees. The materials provide information on health plan cost and availability, and how plans break up costs between employer and employee. Read the iHealthBeat summary:
